

7th Einstein Telescope Symposium: 'the first joint ET-LIGO 3G meeting'

Contribution ID : 0

Parametric amplification to improve the sensitivity of next generation detectors at high frequency.

Tuesday 02 Feb 2016 at 17:40 (00h50')

Content :

We would like to discuss the possibility of further improvement of the ET/CE sensitivity at high frequencies using parametric amplification techniques. There are several regimes so we can combine those ideas to make one discussion session.

Primary authors : Prof. SOMIYA, Kentaro (Tokyo Institute of Technology)

Co-authors : Mr. YANO, kazushiro (TokyoInstituteofTechnology) ; Mr. KATAOKA, Yuu (Tokyo Institute of Technology) ; Mr. YAGINUMA, Takuya (Tokyo Institute of Technology)

Presenter : Prof. SOMIYA, Kentaro (Tokyo Institute of Technology)

Session classification : Poster session

Track classification : Technologies

Type : Poster
